***IMPROVING YOUTH KNOWLEDGE ABOUT THE HAZARDS OF FREE SEX
WITH BOOKLET MEDIA***

SUMMARY

Increase adolescent knowledge about the dangers of free sex with booklet media. Adolescent is someone aged 10-21 years who experiences a process of growth and development both psychologically and intellectually. Adolescents have unique characteristics such as a high sense of curiosity, like big challenges and dare to take risk for their actions without thinking carefully.

Efforts were made to obtain information about the dangers of free sex through printed media. One of the print media that can be used is a booklet, because the delivery is more detailed and clear, so that by using the booklet the community/ youth will be more able to receive the information intended in it.

The benefits of booklets as a medium of knowledge communication include being able to increase knowledge for adolescents about the dangers of free sex, easy to understand, can provide information about the dangers of free sex, and can be used as a means of learning about the dangers of free sex.
