**PENGEMBANGAN *BOOMIBETALO* (BOOKLET MITIGASI  
BENCANA TANAH LONGSOR) SEBAGAI MEDIA  
PEMBELAJARAN TENTANG MITIGASI  
BENCANA TANAH LONGSOR**

**SUMMARY**

Background: Landslides are one of the most frequent disasters in Indonesia. So, it is necessary to have a more serious handling from the government and society, one of which is by mitigating landslides such as identifying areas prone to landslides from an early age, in order to prevent material and non-material loss and casualties. Based on the physical and climatic conditions, theoretically Ngargoyoso District also has the potential for a large landslide disaster at any time. Purpose: To increase knowledge about landslide disaster mitigation in the community. Method: Booklet entitled BOOMIBETALO (Booklet of Landslide Disaster Mitigation). Conclusion: Boomibetalo (Landslide Disaster Mitigation Booklet) is a booklet that contains a description of landslide disaster mitigation, Boomibetalo is small and easy to carry everywhere, besides that it is also designed attractively so that readers are interested in reading it.

Keywords: Landslides, Landslide Disaster Mitigation, Booklet
