**PENGGUNAAN MEDIA *BOOKLET* SEBAGAI PENINGKATAN PENGETAHUAN  
KELUARGA TERHADAP PERAWATAN  
STROKE DI RUMAH**

**Background:** Stroke is a condition that occurs when the blood supply to a part of the brain is suddenly interrupted, because some brain cells die due to impaired blood flow due to blockage or rupture of brain blood vessels. Stroke requires comprehensive management including recovery efforts in the long term even for the rest of the patient's life. Therefore, one of the family members who has had a stroke and causes disability, which makes stroke patients less able to meet their self-care needs, stroke patients need both minimal and total assistance. The role of family in post-stroke care at home is very much needed in healing patients by providing social support, motivating families and families helping to seek treatment. **Purpose:** increasing family knowledge of stroke care at home. **Method:** using the output booklet entitled "Tips for Stroke Treatment at Home". **Conclusion:** the use of booklet media as an increase in family knowledge of stroke care at home. The use of booklet media is also more effective and efficient because booklets are a tool to convey writing with images that are packaged attractively and can be read at any time and can be stored for a long time.

**Keywords:** Knowledge, Stroke, Stroke Treatment at Home
