ESSENCE

Background; In diabetes mellitus wounds there is an exudate consisting of enzymes that have the potential to inhibit the healing process, enlarge the wound, and cause pain. To help reduce exudate in wounds, a dressing that is able to absorb exudate is needed well, namely with modern wound care dressings using herbal shamders, herbal dressings are able to absorb exudates in diabetic wounds, but herbal dressings are much cheaper than using other dressings. **Aim;** Introducing to the public a lot about diabetes wound care using modern dressing techniques and increasing the public's knowledge that herbal dressings are not only used on menstruating women but can be an ingredient in wound care. **Output Description;** The video of modern dressing with herbal dressings as being absorbed into the diabetes mellitus wound contains the presentation of the material which is attractively packaged using dubbing and pictorial writing. **Conclusion;** Herbal dressings can help the absorption of exudate in diabetes mellitus wounds and modern video dressings with herbal dressings as absorbed in diabetes mellitus wounds can be used as a medium of education, communication and information.

Keywords; *Diabetes Militus, absorbed, herbal dressings, modern dressings.*
