PERKEMBANGAN MOTORIK ANAK USIA <i>TODDLER</i>	
SUMMARY	
<p>Background: The results of research on motor development in children revealed that there were 49% delays in motor development, due to poor knowledge of mothers and occurred in developing countries. Therefore the writer has an idea/ideas to make a poster PERKEMBANGAN MOTORIK ANAK 1-3 TAHUN. Purpose: To provide information about the motor development of toddler-age children (ages 1-3 years) to the community, especially parents who have toddler-age children (age 1-3 years). Method: Using a media poster entitled PERKEMBANGAN MOTORIK ANAK 1-3 TAHUN. Conclusion: Expected through a media poster entitled PERKEMBANGAN MOTORIK ANAK 1-3 TAHUN parent are more aware of the motoric development of children at the age of 1-3 years, always monitor the development of children because children aged 1-3 years do a lot of new things that really need supervision from parents.</p>
