Background: Burns are a trauma that occurs as a result of human activities in households, industries, *traffic accidents*, and natural disasters. In Central Java province, the incidence of burns was 12,213. Inaccurate community habits, as is done by some people when someone has burns, many people provide first aid in cases of burns in an inappropriate way. Information about immediate burns first aid to minimize the occurrence of unwanted impacts can be disseminated through the media. One of the media that can be used is a *booklet*. **Methods:** The IEC method in the form of a *booklet* containing various burns and the right steps to help burns. **Result:** IEC media is in the form of *booklets* because the media *booklet* contains clear information and is accompanied by supporting pictures so that it is easy to understand. **Conclusion:** the media *booklet* provides clear and easy to understand information in simple and concise language so that it can be easily understood by the public about correct first aid for burns

Key words: *burns, first aid, booklet.*
