## **SUMMARY**

**Background:** Diabetes Mellitus (DM) is a chronic condition characterized by an increase in blood glucose concentrations rising above normal limits. DM is a disease that threatens human health, especially DM sufferers. In DM patients the main problem that will arise is ulcers / wounds that occur on the feet if not treated, the wound will get worse and cause various other diseases. One of the symptoms caused is a wound that does not heal. **Purpose:** My goal is to use the video output, to add insight to health professionals about the benefits of aloe vera gel used in diabetic wound healing, especially for people with diabetes. **Method:** The method used is to use IEC media, namely video, which is expected to be a source of information about the benefits of aloe vera gel for diabetic wound healing. **Results:** The results of the video will be IPRed at 'Aisyiyah University, Surakarta and the video can be useful for the community, especially DM patients. **Conclusion:** as a medium of education and health, educational media for the public and the general public, especially for DM to increase knowledge about the procedure for applying aloe vera gel for diabetic wound healing.
