

A MODULE ENGLISH FOR HEALTH

Penyusun Fitri Kurniawan,M.Res.,Ed

PROGRAM STUDI NERS STIKES 'AISYIYAH SURAKARTA 2018

Ĺ

VISI

"Menjadi Perguruan Tinggi 'Aisyiyah yang unggul dalam bidang kesehatan untuk menghasilkan sumber daya manusia yang berakhlakul karimah dan kompetitif di tingkat nasional tahun 2022"

Misi

- 1. Menyelenggarakan dan mengembangkan pendidikan yang unggul bertaraf nasional di bidang akademik serta non-akademik yang bernafaskan Islam
- 2. Mengembangkan dan melaksanakan penelitian untuk menghasilkan teori yang mendukung pembelajaran
- 3. Melaksanakan pengabdian kepada masyarakat yang mendukung peningkatan mutu pendidikan
- 4. Mengembangkan jejaring dengan lembaga pendidikan, lembaga penelitian, lembaga pemerintah dan masyarakat ditingkat nasional

TUJUAN

- 1. Menghasilkan tenaga kesehatan yang unggul dan berakhlakul karimah
- 2. Menghasilkan karya penelitian berupa pengetahuan, metode dan teknologi yang mendukung pembelajaran dan berguna bagi masyarakat
- 3. Menghasilkan karya pengabdian kepada masyarakat di bidang kesehatan
- 4. Menghasilkan kerjasama kemitraan yang mendukung kegiatan akademik, penelitian dan pengabdian kepada masyarakat secara nasional.

Visi

Mewujudkan Program Studi Ners dengan unggulan manajemen bencana untuk menghasilkan sumber daya manusia professional, berakhlakul karimah dan kompetitif di tingkat nasional pada tahun 2022

Misi Program Studi

- 1. Menyelenggarakan pendidikan, pembelajaran dan bimbingan profesi Ners yang bermutu dan Islami.
- 2. Mengembangkan penelitian yang mendukung pengembangan IPTEK dalam bidang pelayanan keperawatan, terutama di bidang manajemen bencana
- 3. Mengembangkan pengabdian kepada masyarakat untuk meningkatkan derajat kesehatan masyarakat terutama yang relevan dengan manjemen bencana
- 4. Mengembangkan jejaring dengan institusi lain di tingkat nasional

Tujuan Program Studi

- Menghasilkan Ners yang Profesional, Islami, berakhlakul karimah dengan unggulan manajemen bencana
- 2. Menghasilkan penelitian yang menunjang pengembangan IPTEK dalam bidang pelayanan keperawatan, khususnya dalam manajemen bencana
- 3. Menghasilkan pengabdian kepada masyarakat yang berbasis penelitian untuk meningkatkan derajat kesehatan masyarakat dan manajemen bencana
- 4. Menghasilkan kerjasama dengan pemerintah maupun swasta dalam penyelenggaraan Catur Dharma PT di tingkat nasional

PREFACE

The module is aimed to develop English skills for nurse in Indonesia. The topic that has been chosen in the module is suitable with what nurses learn. The authors hope this module will be useful for nurse in learning English, especially helping nurses understand the nursery object in English so that they can use English in their daily activity.

Based on a need analysis which has been observed, the most important and needed skill is speaking. The module focuses on speaking skill so that there are some exercises to develop the skill. However the module help developing reading skill too because it is an important skill to help nurses get information in English language. The tasks inside the module are quite variative (develop speaking, reading, listening and writing) to make the learners interested in learning English.

This module is not only to develop English skill for nurses but also to fulfill ESP (English for Specific Puspose) assignment. The authors know that it is not a perfect module but the authors hope this module can be useful and accepted by the lecturer.

CHAPTER 1: INTRODUCING SELF

Learning Objectives:

To introduce self as a nurse to the patient

To know patient's identity

Vocabularies:

name - surname - check - health insurance

Expressions:

Hello/ Good Morning/

Good Afternoon/ Good Evening.

I am nurse, my name is

I will take care for you today.

What can I do with you?

What do you need?

May I check your identity?

Is it "Miss or Mrs.?"

What is your name?

How old are you?

What brings you to the hospital?

Do you have a health insurance?

If you need (help/anything) you can call me or other nurses. The nurse will help you.

Task 1

Please complete the dialogue below!

Nurse: "Hello, good morning!"

Patient: "Good morning"

Nurse: "....."

Patients: "I need a medical checkup, can you

help me?"

Nurse: "Yes, of course.....?"

Patient: "Yes, you may. My name is Rita

Sugiarto."

Task 2

Please work in pairs.

Make a dialogue between nurse and patients at the first time they meet and Practice it in front of the class!

CHAPTER 2: SHARING OBSERVATION

Learning Objectives:

To know patients' condition.

Vocabularies:

```
Pale – daydream – tired – moan – tense -
bouncy – suffocate – stiff – painful –
tender – gasp – swollen – bruise – sigh –
groan – rigid – afraid of ...
```

Expressions:

You look

Is your (parts of body) feel uncomfortable?

You seem with your (parts of body)

You seem to have problem with your ... (parts of body).

Task 1

- 1. You look
 - a. angry

c. pale

b. hungry

- d. happy
- 2. You seem with your neck.
 - a. painful

c. rigid

b. tense

d. swollen

Task 2

Make six groups, each group observe patient's expression from the picture below and show to the class about your work!

CHAPTER 3: GIVING MEDICAL DIRECTION

Learning Objectives

Checks patient's details.

Give the patients direction to choose any medical checkup.

Give the patient information around the ward.

Vocabularies

Appointment – prescriptions – treatment – assessment – life-threatening – cubicle.

Expressions

What kinds of medical check-up do you want?

How about you do the (kinds of medical checkup)?

May I check your blood pressure first, please?

The (toilet/ nurse's room/ doctor's room/ laboratories) is (beside/on) (right/ left/ ... floor).

Task 1

Complete the sentences with the words from the list.

- 1. A snake bite can be
- 2. Receptionists make for patients.
- 3. Go into the to get undressed.
- 4. Arms and legs are called
- 5. Sometimes it is difficult to read
- 6. The doctor decides on the correct
- 7. A triage nurse makes an initial
- 8. The patient is to certain antibiotics.

Life-threatening prescriptions	treatment assessment	cubicle allergic
limbs	appointments	

Task 2

Make a dialogue with this situation:

- a. The patient needs to go to the laboratories to do the DNA test.
- b. The patient asking the Orthopedist's room.
- c. The patient asking about the schedule of the dentists.
- d. The nurse needs the patient's ID to write it into the note for the health record.

Choose one of the situations, do this with your pair and practice in front of the class!

CHAPTER 4: ASKING AND GIVING DIRECTION

In this chapter you will find these English expressions useful if you are lost or want to get to a particular place or give directions to others.

Learning Objective

After studying this chapter, student should be able to:

- 1. Use expressions related to giving directions correctly
- 2. Give directions to a certain place in or out of hospital

Prepositions of Place and Movement

To describe the place where something is, we use prepositions such as in, on, on top of, AT the top/bottom of, inside/outside, neAR, next to, by, un front of, behind, opposite, under, over, AT, on the left/right.

The shop is near the entrance, on the right of reception.

The toilets ARe AT the bottom of the stAIrs, on the left.

To talk about movement, we use prepositions such as up, down, into, out of, AWAY, from, to, through, ACROSS, ALONG, PASt, bACK to AROUND, left/right.

Go through the swing doors, turn left ALong the corridor, ANd the coffee bAR is in front of you.

Prepositions of movement are used with verbs of movement such as *go, come, take, push, carry.*

Can you take these files back to the office, please?

To get from here to surgery, you HAVe to wheel the trolley through three WArds.

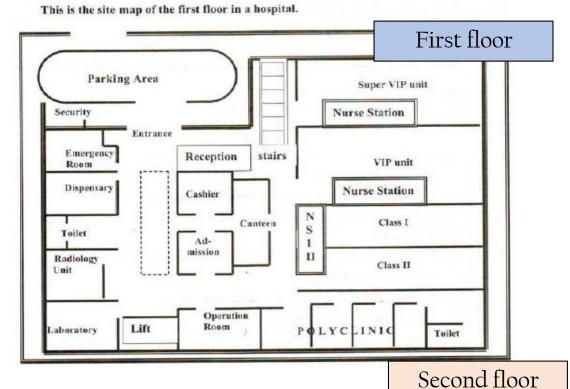

Asking for Directions

- Where is the... from here?
- Excuse me sir. I am looking for... How do / can I get there?
- Do you know the directions to...?
- Pardon me. What are the directions to ...?
- What is the way to...?
- How do I go / get to...?
- Please tell / give me the way to...
- Can / could you help me? I want to go to...
- Can you give me directions to...?
- Could you tell me the way to...?

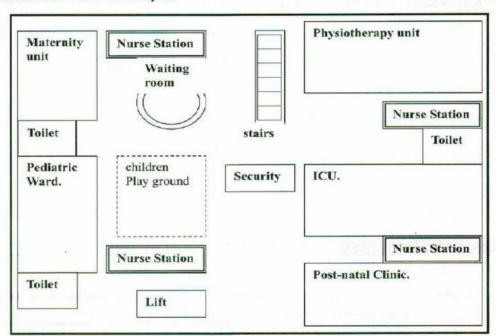

Giving for Directions

- Go up / down... for... blocks.
- Go up / down... to....
- Go straight ahead to....
- You go along... to... .
- Walk / drive (that way) until you see Benson Ave.
- Continue in the same direction until (you get to) the stop sign.
- Turn right / left at / on....
- Don't turn there.
- At the intersection / traffic lights, turn right / left.
- At the corner of... and..., you turn right / left.
- It's on your left / right.
- It's the second building on the / your right / left.

Task 1

This is The 2nd floor of a hospital.

Refer to the site map above. Make a conversation to show the direction. The starting points are as follows.

- 1. The security to maternity unit
- 2. The nurse station in ICU to the canteen
- 3. The security to the toilet (between dispensary and radiology)
- 4. The emergency room to the lift
- 5. The polyclinic to the pediatric ward (on the 2nd floor)
- 6. The waiting room to the children playground (on the 2nd floor)
- 7. The operation room to ICU (opposite the physiotherapy unit)
- 8. The entrance to the Class 1
- 9. The nurse station (near the lift on 2nd floor) to the laboratory
- 10. The emergency room to admission

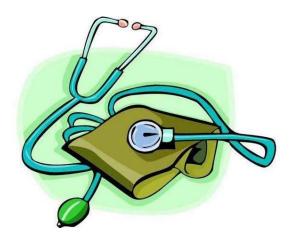

Task 2

- Make group of four.
- Each group decides a place based on the map above.
- Tell the place one by one in front of the other groups, and then let them guess the place.
- The fastest group who raise their hands become the group which has a chance to answer/guess it.
- The winner is the group which has the highest point
- Other groups take their turn

For example: From the Royan avenue, go straight then you turn left through second parking area and you turn left again. The room is a wide one.

CHAPTER 5: ASSESSING (1): GENERAL

Learning Objectives

After completed this chapter, the students will be able to:

- 1. To use expressions for collecting demographic data
- 2. To use questions to collect current and past health-illness data

Collecting Demographic Data Elements

a) Learn these expressions to initiate communication

Г	_1_::	1				immediately	
ΓXI	niaining	wharv	уон аге	SOLDS LO) (1()	ımmediarer	v.
	710111111	* * * * * * * * * * * * * * * * * * * *	,	201112		111111111111111111111111111111111111111	, .

- It is time for me to
- I just want to
- I would like to
- I am going to
- I need to

interview the patient to assess their health condition

b) Question to collect demographic data elements

Learn and practice these expressions

Question To Ask

NAME: What is your name?

What is your complete name?

What is your surname?

AGE: How old are you?

ADDRESS: What is your address?

Where do you live?

PHONE: Your phone number, please

What is your phone number?

Do you have a mobile phone?

MARITAL STATUS: Are you married?

HEALTH INSURANCE: Do you have any health

insurance?

OCCUPPPATION & TITLE: What is your occupation?

Do you have any academic title?

What is your title?

What do you do?

NEXT OF KIN: Who is your next of kin?

REASON FOR CONTACT What brings you in this hospital?

It is a reason that makes you come to hospital. It can be a chief

complaint, medical checkup.

Who sends you to this hospital?

What makes you come to this

hospital?

Task 1

Pair Work

- Interview your friend
- Fill in the blanks with his/her personal demographic data.

Name	<u>:</u>
Age	:
Sex	:
Address	:
City, State	:
Phone	:
Religion	:
Marital Status	:
Health Insurance	:
Current Occupation and	:
Title	
Family status	:
Reason for contact	<u>:</u>
Date, time of contact	:

Vocabularies: Surname Next of kin Assess Assessment Occupation

Current-Health and Illness Status

Expressions

Current Health Status

- What do you think about your health?
- Would you tell me about your health condition recently?

Sample of patient's response: "I'm usually healthy, have usual cold, and have to take medicine for high blood pressure"

- Would you tell me about your?
- How many times a day do you do your?
- Do you have any problem with your?

History of Past Health and Illnesses

Expressions

Assessment Step: Asking Common Communicable Disease

• Have you ever had + a kind of disease.....?

Response: Yes, I have/No, I haven't

• How old were you when you got it?

Response: I was aboutyears old

• Are you allergic to.....(a certain food/medication)

(Example: Are you allergic to penicillin/antibiotic)

Assessment Step: Asking about Immunizations

- Have you ever been immunized against + (a kind of disease)?
- Have you ever got......+ (a kind of disease)......immunizations?

Example: Have you ever got polio immunizations?

Task 2. Pair Work

Assess your partner or your friend's current health condition by using question listed above!

CHAPTER 6: ASSESSING (2): PATIENT

Learning Objectives

After studying this chapter, student will be able to:

- 1. To ask questions about patient's health problem
- 2. To report about the nursing diagnose
- 3. To report the symptoms of a health problem

Nurse's questions to check the patient's complaint/condition

Expression

- How is your problem?
- How are you feeling today?
- What your chiefs complain?
- What's troubling you?
- What's the matter with you?
- What's wrong with you?
- What seems to be bothering you?

Patient's expressions about symptoms and physical problem.

1. I have + (a part of the body + ache)

A toothache

A headache

A stomachache

A backache

2. I have + (a sore+ part of the body) A

sore throat

A sore foot

A sore arm

A sore knee

3. I have/get + kinds of physical problem

The measles

The flu

A cold

A bloody vomit and stool

A bowel movement

A bad cough

A fever

4. I feel + kinds of physical problem

Dizzy

Slick

Catch a cold

Cough

Cold and clammy

Unwell

In bad shape

5. I experience + kinds of physical problems

Lassitude

Low back pain

Difficulty breathing

Cold and clammy

6. I suffer from + kinds of certain illness

Cancer

Constipation

7. I sprained my (possessive) + joints/bones problems

Ankle

Broke

Collarbone

Hurt

Leg

Arm

Nurse's report/diagnose/how to report about patient's condition/complaint

Reporting

• He/she complains about

his/her

+ part of body

Has

+ Health problem

Suffer from + health problem

• Diagnosis

He/she may have.....

+ disease/health problem

Seems to have

Vocabularies

- Toothache
- Headache
- Stomachache
- Backache
- Broke
- Collarbone
- Hurt
- Leg
- Arm
- Clammy

Task 1

Make a conversation between a nurse and a patient and then Perform it in front of class.

Conversation 1

Patient:

• call a nurse, state your complaint

Nurse:

- ask what the problem is
- Repeat patient's expression for sure, and tell the patient that you will report his/her condition

Nurse:

• ask about patient's complaint

Tell the doctor about the symptoms and your diagnosis

CHAPTER 7: ASSESSING (3): PAIN

Learning Objectives

- Student can understand what is paint assessment
- Student can identifying the characteristics of the patient's pain

Assessing Pain

Pain assessment

Assessing pain can be complicated as the physical and physiological aspects of the patient all need to be considered. Because the experience of pain is very subjective, the nurse needs to be able to use some objective criteria to evaluate the location, nature and intensity of the pain so a diagnosis can be made. One of the most widely accepted definitions of pain was put forward by McCaffery (1979, p.18), who suggests that pain is 'whatever the experiencing person says it is and exists whenever he says it does'.

2. Assessments of the patient's pain experience

When identifying the characteristics of the patient's pain it is essential the nurse considers the following:

- The type of pain: is it crampy, stabbing, sharp? The patient's
 description of the pain may help in diagnosing its cause. Myocardial
 (heart) pain is often described as stabbing, but liver pain ascramping
 or aching.
- Its intensity: is it mild, severe or excruciating? This can be described by using a pain assessment scale. The nurse asks the patients to rate the pain on a scale of 0 to 10; zero being no pain and 10 being excruciating pain. With children, a range of pictures showing a child changing from happy to sad can be used. Colour charts with a series

- of colours from black through grey to yellow and orange can be used, especially with patients who have difficulty grasping numbers or articulating exactly what their pain is like.
- The onset: was it sudden or gradual? Find out when it started and in what circumstances. What makes it worse? What makes it better?
 What was the patient doing immediately before it happened?
- Its duration: is it persistent, constant or intermittent?
- Its location: ask the patient to be as specific as possible, for example, indicating the site by pointing.
- Changes in the site: there may be tenderness, swelling,
 discolouration, firmness or rigidity. With appendicitis, a classic sign
 is the movement of pain to the right and downwards. In a myocardial
 infarction (a heart attack), pain classically radiates down the arm,
 and with liver pain it can radiate to the shoulder.
- Any associated symptoms: Some of the common symptoms of disease that can influence the response to pain are anorexia, constipation, cough, inflammation, anxiety and fear, dryness of the mouth.
- Signs such as redness, swelling or heat.

Task 1

Read the text below and write T (true) or F (false) next to each of the statements.

- 1. Assessing pain is straightforward process
- 2. Pain is an object experience
- 3. It is important for a nurse to use objective criteria to measure the level of pain

- 4. Colour 'mood' chart are only useful for children
- 5. The first step for a nurse is to identify characteristics of the patient's pain.

MATCH the ADJective to the picture, make the line to the right ADJective.

shooting gnawing stabbing burning stinging

Task 2

MAKE the description of PAin in your own language.

CHAPTER 8: MONITORING THE PATIENT

Learning Objectives

After completed this chapter, students will be able to:

- Use questions to collect current and past health illness data
- Ask some question to the patient about the condition

Useful Expressions (Asking common Communicable Disease)

- Have you ever had + a kind of desease?
 Response: yes, I have/no, I haven't
- How old were you when you got it?
 Response: I was about.....years old
- Are you allergic to......(a certain food/mediciation)
 (Example: are you allergic to penicillin/antibiotic)

Kinds of diseases: measles-mumps-rheumatic-fever-scarlet fever.

- 1. Current Health and illness Status
- What do you think about your health?
- Would you tell me about your health condition?

Sample of patient's response: "I'm usually healty, have usual cold, and have to take medicine for high blood pressure"

- Would you tell me about your?
- Do you have any problem with your.....?
- How many times a day do you do your?

Task 1

Choose the correct option to complete the sentences

- 1. The heart rate ARe monitored / is monitores / monitored regularly
- 2 The nurses ARe checked / is checked / checked
- 3. Mrs Ramone removed/were removed/WAS removed her dentures before going to theatre
- 4. I didn't tell/WASn't told/not told i was expecting twins
- 5. She WASn't give / GAVE / given the correct diagnosis

Task 2

Use the information in the text to complete the sentence with the correct answer a,b or c

- 1. Nurses are in a good position to
 - a. Monitor patients
 - b. Specialize
 - c. Get to know their patients
- 2. What is happening to this patient? is a question which
 - a. Only nurses can answer
 - b. Monitoring helps t answer
 - c. Nurses must ask
- 3. Technological aids give information about
 - a. Internal organs
 - b. Bodily fluids
 - c. Vital signs

- 4. Self monitoring is
 - a. Done by doctors and nurses
 - b. Done at a hospital
 - c. Cheap and conventient

CHAPTER 9: DIAGNOSING HEALTH PROBLEMS

Learning Objective

After completed this chapter, students will be able to:

- Communicate about implementation of diagnosing health problem
- Give some instructions during implementation of diagnosing health problem

Nursing Notes

Inspection, palpation, percussion and auscultation are examination techniques that enable the nurse to collect a broad range of physical data about patients.

1. Inspection

The process of observation, a visual examination of the patient's body parts to detect normal characteristic or significant physical signs

2. Palpation

Involves the use of the sense of touch. Giving gentle pressure or deep pressure using your hand is the main activity of palpation.

3. Percussion

Involves tapping the body with fingertips to evaluate the size, borders, and consistency of body organs and discover fluids in body cavities.

4. Auscultation

Listening to sounds produced by the body.

Vocabulary

Pulse rate

Rhythm or regularity

Tension

Beats per minute

Patient's chart

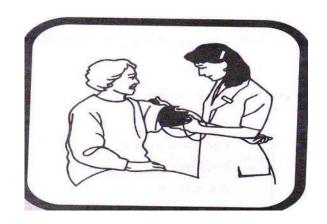

Normal pulse rhythm

Bradycardia

Tachycardia

Bounding

Thread/weak

Medical Terms	Colloquial expression
Dyspnea	Breathlessness, out of breath, short of
	breath, fighting for breath
Expectorate	To bring up/cough up phlegm/spit
Expiration	Breathing out
Inspiration	Breathing in
Respiration	Breathing
Sputum	Phlegm

Useful Expressions

Implement ATIOn step

Now I am going to... It's time for me to... Now I want to...

press your...
examine your...

+ (parts of body) artery cheeks neck gently

Instruction

Would you...?

Now I want you to ...?

remove + your wig
put off+your hairpieces

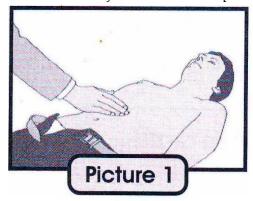

Please + rise your eyebrows
frown your forehead
smile
puff your cheeks
shrug your shoulder
flex your neck with chin toward
bend your neck, with ear toward shoulder
take a sip of water from this glass

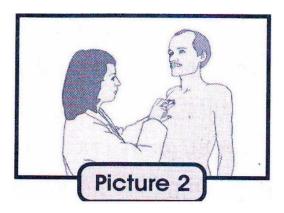

Task 1

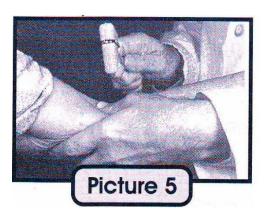

Mention WHAT ACTIVITY you do for eACH CASe listed below.

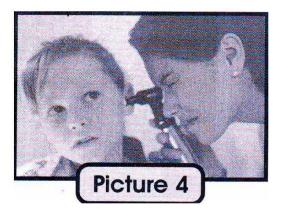

No	Activity	Technique
1	Examining patient's respiratory	
2	Inspecting the mouth and throat	
3	Asking patient to stand up to find whether there is scoliosis or not	
4	Pressing her middle finger of non-dominant hand firmly against the patient's back. With palm and fingers remaining off the skin, the tip of the middle finger of the dominant hand strikes the other, using quick, sharp stroke.	
5	Observing the color of the eyes	
6	Observing the movement of air through the lungs	
7	Testing deep tendon reflexes using hammer	
8	Checking the tender areas with her hand	
9	Pressing abdomen deeply to check the condition of underlying organ	
10	Preparing a good lighting, then he observes the body parts.	

Task 2 What kind of examination technique?

Task 3 Whole class and pair work

- PRActice these instructions
- Listen to teACHEr's instruction And ACT themout
- Then, practice these in Pairs
- 1. Raise your eyebrows
- 2. Close your eyes tightly
- 3. Frown
- 4. Smile
- 5. Puff your cheeks
- 6. Shrug your shoulder
- 7. Flex your neck with chin toward

- 8. Bend your neck, with ear toward shoulder
- 9. Take a sip of water from this glass

Task 4 Pair work

- O MAKE A complete conversATIOn on ACTS of ASSessing heAD, fACe ANd neck
- o Use the expression ABove

Doctor's Diagnosis - English Vocabulary

Example Sentences

Physician

- Your test results have come in.
- I'm afraid the prognosis isn't good.
- You have a long road to recovery.
- We have several options to discuss.
- The blood test came back negative.
- The transfusion was a success.
- It looks like you're ready to go home.
- I'd like to keep you here overnight.
- We'll know more in a few days.
- You're not in the clear yet.
- We've ruled out diabetes.
- I'm hoping to get to the bottom of this soon.

Patient

- I don't understand what this means.
- Am I going to need surgery?
- Is it good news or bad?
- When will the tests results come in?
- How long do I have to stay in the hospital?
- What is the success rate?
- Are they going to run more tests?
- Is this a common problem for people my age?

- I'd like to discuss other options.
- I'm going to get a second opinion.

SAMPLE CONVERSATION

Doctor: Hi Jessica. How are you feeling today?

Patient: A bit better.

Doctor: That's good to hear. Are you still feeling nauseous?

Patient: No, I haven't felt sick to my stomach since you switched my

medication.

Doctor: Great. Say, your test results came in this morning.

Patient: It's about time. Is it good news or bad?

Doctor: I guess it's a bit of both. Which do you want first?

Patient: Let's get the bad news over with.

Doctor: Okay. It looks like you're going to need surgery to remove the tumour from your leg. After the operation you're going to have to stay off your feet for at least three weeks. That means no soccer.

Patient: I was afraid you were going to say that.

Doctor: Now for the good news. The biopsy shows that the tumour is benign, which means it's not cancerous. We're going to take it out anyway just to be on the safe side.

Patient: Wow, that's a load off my mind. Thanks Doctor.

Doctor: Don't get too excited. We still need to get to the bottom of all of this weight loss.

Patient: I've probably just been so worried about this stupid lump.

Doctor: These things often are stress related, but we're still going to do a few blood tests just to rule a few things out.

Patient: Things like what? Cancer?

Doctor: Actually, I'm thinking more along the lines of a food allergy.

Task 5 Test your understanding

- 1. Why did the woman have to switch medication?
- 2. What bad news does the doctor give the patient?
- 3. What medical procedure did the patient already undergo?

CHAPTER 10: UNDERSTANDING AND GIVING INSTRUCTIONS

Learning Objectives

To understand and give instruction according to the patient's health problem

To deliver a therapeutic communication

Language Spot

To tell somebody what to do, you can use the imperative.

Check for signs of circulation!

Apply the PAds to his chest!

To tell somebody what not to do, add Don't...

Don't remove burnt clothing!

To emphasize what is important, you can use MAKE sure...

MAKE sure the wound is clean!

MAKE sure you don't touch his body!

When asking for instructions, you can use the Present Simple, HAVE to, shall, and should.

WHAT I do now?

Do I HAVE to immobilize his leg?

SHAll I take off the dressing now?

WHAT dosage should I give him?

Instruction Charts

WOUND CARE (CUTS, ABRASIONS, BURNS)

- 1. Keep the area clean and dry
- 2. Keep wound covered with a clean dressing, change the dressings daily
- 3. Keep the injured part at rest and elevate for 12 hours
- 4. Watch for redness, pus, or increased soreness. Contact your doctor if this occurs
- 5. Have your wounds checked and your sutures removed as advised by the emergency physician in ... days.

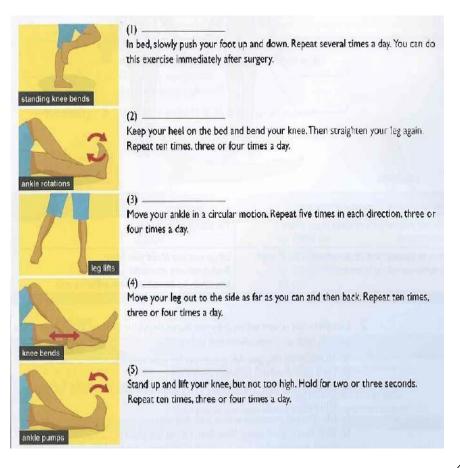

CAST/SPLINT CARE

- 1. Do not apply any weight or pressure on a new cast or splint for the first 24 48 hours
- 2. Keep the cast/splint clean and dry
- 3. Elevate the injured part for 48 hours on pillows above your heart
- 4. Do not put foreign objects inside the cast
- 5. Wiggle your fingers or toes inside the cast every hour
- 6. If your fingers or toes become extremely swollen, cold, blue or numb, or the pain increases markedly, loosen the ace bandage of the splint, or if it cast, call your doctor or return to the Emergency Department.

Task 1 Read this brochure And write the correct exercise in eACH space (1-5)!

Exercises for Recovery

Regular exercises are important to help you after surgery. Your orthopaedic surgeon and physical therapist may recommend that you exercise 20 to 30 minutes, two, or three times a day.

Task 2

Work in pairs!

Student A

You are a parent. Five minutes ago a poisonous snake bit your child.
You phone an emergency helpline. Explain the situation to the
helpline nurse, then listen and use these notes to find out what to do.
Note down the instructions that you are given.

EXAMPLE

WHAT SHALl I do with the wound?

Should I put it on ice? Should I?

- wound ice? bandage?
- child thirsty milk OK?
- walk around?
- doctor?
- 2. You are a nurse working on a telephone helpline the emergency, then use these notes to tell the caller what to do and to answer any questions.

EXAMPLE

MAKE sure he gets fresh AIr! Open windows ANd doors, ANd

- fresh air ✓✓ (windows/doors ✓, carry if necessary ✓, walk x)
- mouth wash out ✓ (water)
- milk ✓ (alcohol*)
- skin remove clothes if covered in pesticide ✓
 wash ✓ (running water, 15 minutes+, chemicals x)
- touch pesticidexx (gloves√√)

Students B

1. You are a nurse working on a telephone helpline. Listen to yourcaller explain the emergency, then use these notes to tell the caller what to do and to answer any questions.

EXAMPLE

WASh the wound with soap and Water. Don't practise....

- wound wash (soap and water)
 - ice
 - bandage (not too tight)
- immobilize the leg (lower than the heart)
- stand up, move

- food, drink
- hospital
- 2. A man you work with has spilt pesticide on his face, eyes, mouth. Phone the emergency helpline for instructions. Explain the situation to the helpline nurse, then listen and use notes to find out what to do. Note down the instructions that you are given.
 - difficulty breathing walk around?
 - drink?
 - mouth? eyes? skin?

CHAPTER II: CHECKING VITAL SIGNS

Learning Objectives

To ask permission to take vital signs

To record vital signs

Vital Signs:

- temperature (oral, armpit, celcius or farenheit)
- pulse (apical, temporal, femoral, radial, carotic, apex of heart, popliteal, dorsalis pedis, posterior tibialis)
- respiration
- BP (Blood Pressure: right arm or left arm).

It is now common practice for nurses to communicate with the patients as much as possible when they are doing routine nursing tasks. If the nurses talk, the patients become involved in their treatment. As the nurses take the patients' vital signs, it will be better if they say what they are going to do, explain why they are doing it and give the patients feedback.

I Need to Take your Vital Signs

Nurse: "I need to take your vital signs to make sure that your temperature, pulse, respiration and blood pressure are okay while you're staying in our hospital."

Patient: "All right."

Nurse: "I'm just going to wrap this cuff around your arm and pump some

air into it so that I can read your blood pressure. Could you please

roll up your sleeve a bit?"

Patient: "Right." (Patient rolls up his sleeve.) "Like this?"

Nurse: "Yeah, that's fine." (Nurse attaches cuff and starts pumping.)

Patient: "It feels a bit funny."

Nurse: "Don't worry. It won't hurt you."

Patient: "What is my blood pressure?"

Nurse: "Your blood pressure is 120/80."

Patient: "Is it OK?"

Nurse: "Yes. It's normal."

Task 1

MATCH the words (1-7) with the definitions (A-G).

1 eupnea 5 resting rate

2 __diastolic 6 stable

3 apnea 7 heart rate

4 __systolic

A a measurement of how many times a person's heart beats per minute

B measures blood pressure as the heart beats

C measures blood pressure as the heart rests

D difficult or irregular breathing

E having steady vital signs

F a measurement of heart beats per minute while not engaged in physical activity

G regular, easy breathing

Task 2

Look AT the pictures below! Describe WHAt the nurse is doing in eACH one!

CHAPTER 12: TELLING SYMPTOMS

Learning Objectives:

To know how to tell symptoms of the patient

Reading Practice

Text 1

Signs and symptoms are the tools for making diagnosis, but what is the difference between the two?

The signs of an illness are the things that a doctor or a nurse can see and measure. Signs are things like spots and bleeding. Temperature, heart rate, blood pressure and respiration rate are all signs because you can measure them. Symptoms are the things which patient experiences, but others can't always see. Dizziness and nausea are examples of symptoms.

The symptoms which make a patient seek medical help in the first place are called the presenting symptoms. Medics describe them in terms of being either strong, mild or weak. Sometimes the symptoms of serious illness like cancer and diabetes are weak. They stay weak for a long time and the illness remains undiagnosed.

Many illnesses have the same symptoms. These are called non-specific. Fatigue is an example of this. It's a symptom of many kind of illness, both chronic and acute, and both physical and mental disorders.

Doctors ask patients about the onset of the symptoms, what they feel like, what relieves them and what makes them worse. The more detail they have, the faster they can make a diagnosis.

Vocabulary Building

Bleeding =

Blood pressure =

Dizziness =

Nausea =

Fatigue =

Task 1

From the text 1, Answer these questions below:

- 1. What is the different between sign and symptom?
- 2. What should doctors or nurses ask to the patient?

Task 2

- 1. She suffered......and vomiting.
- 2.is an external symptom.
- 3. She had a abdomen.
- 4. are typical symptom of chicken pox.
- 5. A deep cut needs.....to heal properly.
- 6. A..... can cause itching.
- 7. He found a..... above his ankle.
- 8. He extremeare difficult to live with.

Choose the correct answer:

Stitches Bruising

Swollen Nausea

Mood swings Lump

Rash Spots

CHAPTER 13: CARING FOR ELDERLY

Learning Objectives:

To know how to take care of the elderly in English

To be able reading text of caring for elderly

To be able to speak with the family of the elderly

Reading Practice

Text 1

Caring for the elderly: Dealing with resistance

CARING for the elderly CAN be CHALlenging — PARTICULARLY If A loved one is resistant to CARE. Understand WHAT'S CAUSING your loved one's resistance and how you CAN encourage cooperation.

By Mayo Clinic Staff

One of the toughest challenges you can face when caring for the elderly is resistance to care. How do you help a loved one who doesn't want or resists help? Understand why resistance to care might develop and strategies for fostering cooperation when caring for the elderly.

What causes resistance to care?

If your loved one is in need of care, he or she is likely dealing with loss — physical loss, mental loss, the loss of independence. Accepting care might mean relinquishing privacy and adjusting to new routines. As a result, your loved one might feel frightened and vulnerable, angry that he or she needs help or guilty about the idea of becoming a burden to family and friends.

In some cases, your loved one might be stubborn, have mental health concerns or simply think it's a sign of weakness to accept help. He or she might also be worried about the cost of certain types of care. Memory loss might also make it difficult for your loved to understand why he or she needs help.

What's the best way to approach a loved one about the need for care?

If you suspect that your loved one will be resistant to care — whether from family, other close contacts or a service — you might be hesitant to bring up the topic. To start communicating with your loved one about his or her need for care:

- Determine what help is needed. Make an honest assessment of what kind of help your loved one needs and which services might work best.
- Choose a time when you and your loved one are relaxed. This will make it easier for you and your loved one to listen to each other and speak your minds.
- Ask about your loved one's preferences. Does your loved one have a preference about which family member or what type of service provides care? While you might not be able to meet all of your loved one's wishes, it's important to take them into consideration. If your loved one has trouble understanding you, simplify your explanations and the decisions you expect him or her to make.
- Enlist the help of family members. Family and friends might be able to help you persuade your loved one to accept help.
- Don't give up. If your loved one doesn't want to discuss the topic the first time you bring it up, try again later.

Vocabulary Building

Relinquishing =

Vulnerable =

Resistant =

Burden =

Task 1

After reading the text you can guess:

- 1. What is the type of the text?
- 2. What is the purpose of the text?
- 3. What is the topic of the text?

Expression

- He will feel better after a short sleep
- I'm afraid your grandfather will not remember your name
- I will help Nancy have her bath
- She likes to have a nap after lunch
- With a mobility aid she can look around the garden

Task 2

Make a dialogue between a nurse and a family member of the elderly (patient)!

APPENDIXES

LESSON PLAN "INTRODUCING SELF"

Time allocation: 2 x 45 minutes

Session	Learning Activities	Time
Opening	 Greet the students Check students'attendance Ask about previous materials State the objective of the today's lesson 	5 minutes

LESSON PLAN "ASKING AND GIVING DIRECTION"

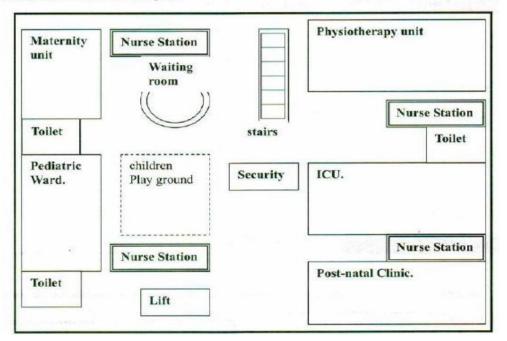

Time allocation: 2 x 45 minutes

Session	Learning Activities	Time
Opening	 Greet the students Check students'attendance Ask about previous materials State the objective of the today's lesson 	5 minutes
	Observing - Students observe prepositions of place and movement (in class)	5 minutes
	Ouestioning Students ask about the uses of prepositions of place and movement (in class)	5 minutes
Lead	 Collecting Information Teacher explains the material about the expression of asking and giving directions See PAGE 8 Teacher shows a picture of hospital map and explain how to use the expressions for giving directions correctly Students analyze the pictures of map (in group) Worksheet 1 	15 minutes
	- Students make a conversation refer to the site map given by teacher (work in pair)	20 minutes
	- Students decide a place based on the map and make the direction (work in group) - Each group guess or answer the place which given by other group.	25 minutes

	- Students write some unfamiliar vocabularies (individual) Worksheet 2	
Closing	 Conclude the materials Close the session 	5 minutes

This is The 2nd floor of a hospital.

Refer to the site map above. Make a conversation to show the direction. The starting points are as follows.

l.	The security to maternity unit
2.	The nurse station in ICU to the canteen
3.	The security to the toilet (between dispensary and radiology)
4.	The emergency room to the lift
5.	The polyclinic to the pediatric ward (on the 2nd floor)
6.	The waiting room to the children playground (on the 2nd floor)
7.	The operation room to ICU (opposite the physiotherapy unit)
8.	The entrance to the Class 1
9.	The nurse station (near the lift on 2nd floor) to the laboratory
10.	The emergency room to admission

- Make group of four.
- Each group decides a place based on the map above.
- Tell the place one by one in front of the other groups, and then let them guess the place.
- The fastest group who raise their hands become the group which has a chance to answer/guess it.
- The winner is the group which has the highest point
- Other groups take their turn

For example: From the Royan avenue, go straight then you turn left through second parking area and you turn left again. The room is a wide one.

LESSON PLAN "ASSESSING (1): GENERAL"

Session	Learning Activities	Time
Opening	 Greet the students Check students'attendance Ask about previous materials State the objective of the today's lesson 	5 minutes
Lead	- Students observe of the table expressions to collect demographic data elements - Students observe the questions to collect current and past healthillness data Questioning - Students ask about the meaning of each expressions (in class) Collecting Information - Teacher explains the material about the function or the use of each expression Students practice the expression to initiate communication - Students analyze how to ask the patient about current-health and illness status and history of past health and illnesses (in group) See PAGE 15	5 minutes 5 minutes
	Students use information to complete the task (work in pair) Students write some unfamiliar vocabularies (individual) Worksheet 1	20 minutes

	Communicating - Students assess their friend's current health condition by using question listed (in pair)	25 minutes
	Worksheet 2	
Closing	 Conclude the materials Close the session 	5 minutes

W	or	le	he	et	7

- Interview your friend
- Fill in the blanks with his/her personal demographic data.

lssessyourpartneroryourfriend'scurrent health condition by using question li bove!	iste

LESSON PLAN "ASSESSING (2): PATIENT"

Session	Learning Activities	Time
Opening	 Greet the students Check students'attendance Ask about previous materials State the objective of the today's lesson 	5 minutes
Lead	Observing - Students observe of the table expressions to check the patient's complaint/condition, symptoms and physical problem, and how to report about patient's condition/complaint.	5 minutes
	 Questioning Students ask about the meaning of each expressions (in class) Students ask questions related to each expression (in class) 	5 minutes
	 Collecting Information Teacher explains the material about the function or the use of each expression. Students practice the expression to initiate communication Students look for the information as the task require (in pair) 	15 minutes
	Students use information to complete the task (work in pair) Students write some unfamiliar vocabularies (individual)	20 minutes
	Communicating	25 minutes

	- Students read the dialogue that they have made front of class (in pair)	
Closing	 Conclude the materials Provide a task as homework Close the session 	5 minutes

Make a conversation between a nurse and a patient and then Perform it in front of class.

Convers Patient: • Nurse:	call a nurse, state your complaint	
	 ask what the problem is Repeat patient's expression for sure, and tell the patient that you will report his/her 	condition
Convers	sation 2	
Nurse:		
•	ask about patient's complaint	
Tell the	doctor about the symptoms and your diagnosis	
-		

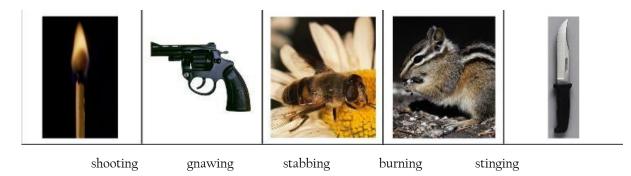

LESSON PLAN "ASSESSING (3): PAIN"

Session	Learning Activities	Time
Opening	 Greet the students Check students'attendance Ask about previous materials State the objective of the today's lesson 	5 minutes
	Observing - Students observe the material about pain assesment.	5 minutes
	Ouestioning Students ask questions about the material.	5 minutes
Lead	- Students disscuss with group about the description about pain with their own word.	15 minutes
	Associating - Students answer the question in the paper	20 minutes
	Communicating - Students collect the paper.	25 minutes
Closing	 Conclude the materials Close the session 	5 minutes

REAd the text below And write T (true) or F (false) next to EACh of the statements.

- 1. Assessing pain is straightforward process
- 2. Pain is an object experience
- 3. It is important for a nurse to use objective criteria to measure the level of pain
- 4. Colour 'mood' chart are only useful for children
- 5. The first step for a nurse is to identify characteristics of the patient's pain.

MAtch the Adjective to the picture, mAke the line to the right Adjective.

MAke the description of PAIn in your own LAnguAge.

LESSON PLAN "MONITORING THE PATIENT"

Session	Learning Activities	Time
Opening	 Greet the students Check students'attendance Ask about previous materials State the objective of the today's lesson 	5 minutes
Lead	Students observe about asking common communicable disease and current healt and illness status.	5 minutes
	Questioning Students ask questions about the material.	5 minutes
	Collecting Information Students look for the information from the books	15 minutes
	Associating - Students answer the question in the paper	20 minutes
	Communicating - Students collect the paper	25 minutes
Closing	 Conclude the materials Close the session 	5 minutes

Task 1

Choose the correct option to complete the sentences

- 6. The heart rate *Are monitored / is monitores / monitored regularly*
- 7. The nurses *Are checked / is checked / checked*
- 8. Mrs. Ramone removed/were removed/wAS removed her dentures before going to theatre
- 9. I didn't tell/wASN't told/not told i was expecting twins
- 10. She wASN't give / GAVe / given the correct diagnosis

Task 2

Use the information in the text to complete the sentence with the correct answer a,b or c

- 1. Nurses are in a good position to
- a. Monitor patients
- b. Specialize
- c. Get to know their patients
- 2. What is happening to this patient? is a question which
- a. Only nurses can answer
- b. Monitoring helps t answer
- c. Nurses must ask
- 3. Technological aids give information about
- a. Internal organs
- b. Bodily fluids
- c. Vital signs

- 4. Self monitoring is
- a. Done by doctors and nurses
- b. Done at a hospital
- c. Cheap and conventient

Task 3

Make a conversation about Asking common communicable disease or current healt and illness status.

LESSON PLAN "DIAGNOSING HEALTH PROBLEMS"

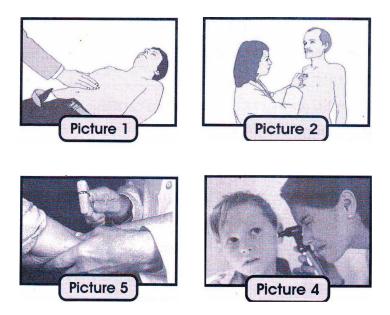

Session	Learning Activities	Time
Opening	 Greet the students Check students'attendance Ask about previous materials State the objective of the today's lesson 	5 minutes
	Observing - Students observe a video (in class)	5 minutes
Lead	Questioning - Students ask questions related to the video (in class)	5 minutes
	- Students look for the information from the PowerPoint slides (in groups)	15 minutes
	Students make a conversation about diagnosing health problems based on the picture on the worksheet.	20 minutes
	Communicating Students play the role in front of the class	25 minutes
Closing	 Conclude the materials Close the session 	5 minutes

Name :

Std. No :

- 1. The nurse performs an assessment of a newly admitted patient. The nurse understands that this admission assessment is conducted primarily to:
 - a. Diagnose if the patient is at risk for falls.
 - b. Ensure that the patient's skin is intact
 - c. Establish a therapeutic relationship
 - d. Identify important data
- 2. When two nursing diagnoses appear closely related, what should the nurse do first to determine which diagnosis most accurately reflects the needs of a patient?
 - a. Reassess the patient
 - b. Examine the related to factors
 - c. Analyze the secondary to factors
 - d. Review the defining characteristics
- 3. A nurse is revising a client's care plan. During which step of the nursing process does such a revision take place?
 - a. Assessment c. Implementation
 - b. Planning d. Evaluation
- 4. The nurse in charge identifies a patient's responses to actual or potential health problems during which step of the nursing process?
 - a. Assessing c. Planning
 - b. Diagnosing d. Evaluating
- 5. A female patient is diagnosed with deep-vein thrombosis. Which nursing diagnosis should receive the highest priority at this time?
 - a. Impaired gas exchange related to increased blood flow
 - b. Fluid volume excess related to peripheral vascular disease
 - c. Risk for injury related to edema
 - d. Altered peripheral tissue perfusion related to venous congestion

Choose one picture and play the role with your group in front of the class!

LESSON PLAN "UNDERSTANDING AND GIVING INSTRUCTIONS"

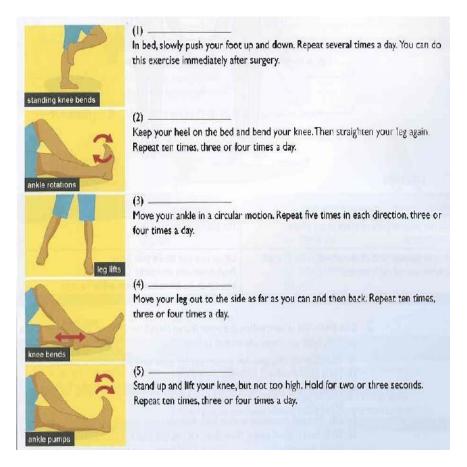

Session	Learning Activities Time			
Opening	 Greet the students Check students'attendance Ask about previous materials State the objective of the today's lesson 	5 minutes		
	Observing - Students observe a Language Spot about understanding and giving instruction (in class)	5 minutes		
Lead	Questioning Students ask the right exercise related to a brochure (individual) Worksheet	5 minutes		
	- Students look for the information from the Instruction Charts (in class) See PAGE 34	15 minutes		
	Associating Students observe the situation from the Speaking Cards given (in pairs) Appendix	20 minutes		
	Students play simulation in front of the class as Student A or B	25 minutes		
Closing	 Conclude the materials Close the session 	5 minutes

Name:		

Read this brochure and write the correct exercise in each space (1-5)!

Exercises for Recovery

Regular exercises are important to help you after surgery. Your orthopaedic surgeon and physical therapist may recommend that you exercise 20 to 30 minutes, two, or three times a day.

Appendix

Speaking Cards

Work in pairs!

Student A

You are a parent. Five minutes ago a poisonous snake bit your child. You phone an
emergency helpline. Explain the situation to the helpline nurse, then listen and use
these notes to find out what to do. Note down the instructions that you are given.
EXAMPLE

WHAt SHAll I do with the wound?

Should I put it on ice? Should I?

- wound ice? bandage?
- child thirsty milk OK?
- walk around?
- doctor?
- 2. You are a nurse working on a telephone helpline the emergency, then use these notes to tell the caller what to do and to answer any questions.

EXAMPLE

MAke sure he gets fresh Air! Open windows And doors, And

- fresh air ✓✓ (windows/doors ✓, carry if necessary ✓, walk x)
