<b>THE IMPORTANCE OF RECOGNIZING THE DANGERS OF PREGNANCY</b>	
<b>ESSENCE</b>	
<p><b>Background:</b> Pregnancy danger signs are an early indicator of abnormalities in pregnant women. The danger signs of pregnancy include vaginal bleeding, severe headaches, swelling of the face and hands, reduced or absent fetal movements, excessive vomiting, and premature discharge of amniotic fluid. Information about the danger signs of pregnancy can be packaged with a poster media output. Posters are one of the most widely used media to convey information by using attractive images and a little explanation. <b>Purpose:</b> Provide clear knowledge information in order to understand the content of the material, make it easier for individuals to understand, remember the content of the material presented. <b>Conclusion:</b> Pregnancy danger signs posters are made to increase knowledge about what are the danger signs during pregnancy as a preventive measure.</p>
