**SUMMARY**

**Background:** Burns are one of the traumas that often occur in daily life, even this condition is often experienced at home, where first and second degree burns often occur. In Indonesia, the prevalence of burns according to the Ministry of the Republic of Indonesia in 2013 was 0.7%. Burns that are left untreated will take longer to heal, if the wound is treated promptly and appropriately, the healing process will be faster. The way to speed up the healing process of these burns is to use aloe vera. **Method :** The IEC output method used is in the form of a booklet containing the definition, causes, classification and SOPs for treating burns using aloe vera independently at home in accelerating burn healing. **Results:** Outcomes project produced that booklet entitled "Strategies Accelerate Wound Healing Tips Fuel Grade I & II With Aloe Vera". **Conclusion:** This media booklet was created in order to assist the public in finding information on the process of accelerating burn healing using natural ingredients aloe vera and as first aid for burns.
