**SUMMARY**

**Background:** Flood disasters are one of the most frequent disasters in Indonesia, including in Central Java Province. The impact of the flood caused many casualties, especially children. Children are most often affected by floods because they are a vulnerable group and 82.7% of children are still unaware of flood mitigation. Therefore, educational efforts with interesting and easy-to-understand media are needed. **Objective:** To produce a media booklet with the title "Great Children to Prevent Floods" to increase children's knowledge about flood mitigation. **Methods:** Booklets are used to provide information and improve primary school children's knowledge about flood mitigation. **Results:** KIE media in the form of a booklet, containing information on flood mitigation activities that can be carried out by elementary school children accompanied by images that support the material so that it is easy to understand. **Conclusion:** The media booklet is expected to make it easier to convey information about flood mitigation for elementary school children and apply it in daily life to minimize the occurrence of floods.

**Keywords:** schoolchildren, floods, booklets, mitigation
